

Typical Use of Environment

I issue only a few cheques every month, thus, I don't need any software or system, I just need something to save me the trouble of hand writing the cheques.

We suggest you use the Cheque Printing Template only. One template can print 2 cheques at one go and can use up to 350 times.

Our company issues 10 - 50 cheques every month, we don't have any accounting software, so we need the cheque records and reports functions.

We suggest you use the VIP Full version. This version can batch print cheques, save all records and generate report & summary.

We issue more than 50 cheques every month. We have accounting software to save cheque records. We just need something that can print cheques very quickly.

We suggest you use the VIP Lite version. It is designed to replace the cheque writer. It does not keep record, but can batch print cheques very quickly.

I work in a government department. We need something to print our cheques, but we cannot do so via the internet. Any solution for us?

Yes, the PrintChequeEasy engine can be easily implemented on an internal system for those customers who could not print cheques via the internet.
